DETAILED ACTION

Claim Objections

1. Claims 8-13 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The preamble of claim 8 is "a computer readable medium" which comprises "a computer readable medium". Further, the claim says on lines 4 and 5, "said comprising". If the preamble is changed, make sure to also change the preambles of claims 9-13.

Pursuant to applicants filing a Terminal disclaimer to obviate provisional double patenting rejection over a pending application, the examiner here by withdraws the Double Patenting rejection.

Allowable Subject Matter

1. Claims 1-6, 9-13 and 15-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The closest prior art, Jacobson (US 6735701 B1) and other prior of records such as TechSmith Corp. (SnagIt User's Guide), show a similar method for cut-and-paste operations. For example, Jacobsen describes typical downloading scenario (e.g.

select source first, designate destination second); and Snag-it does not insert content into an existing user interface while viewing a file, but instead creates a new file, email, document, etc. Most of these operations are source first, destination second sequence. However, Jacobson, singularly or in combination with Snag-it (or with the prior art of records), still fail to anticipate the invention's "destination first, source second sequence", repeated automatic copying without designating the destination, automatic content capture and insertion process, in combination with the sequential operation of all the steps claimed.
